Art Unit: 3751

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8 and 17-21, drawn to a water control system, classified in class 4, subclass 366.

II. Claims 9-16, drawn to a water control method, classified in class 4, subclass 661.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a method not requiring "providing" a switch and actuator.

2. A telephone call was made to William N. Hulsey on March 29, 2005 to request an oral election to the above restriction requirement, but did not result in a confirmed election being made.
